CAREER OBJECTIVE :

To create captivating user interfaces and seamless web experiences through frontend development. My goal is to blend design and technology, ensuring user satisfaction and business success, while staying up-to-date with evolving web standards.

SKILLS :

Expertise : HTML5 | CSS3 | Tailwind | Bootstrap | React | Firebase | MongoDB

Comfortable : Node.js | Express.js | Ant Design

Familiar : Material UI | Redux Toolkit

PROJECTS :

Team Project:

Trip Sure (Worked as a Frontend Developer)

[codelink](#) [serverlink](#) [Livelinek](#)

- Easily search for destinations, select travel dates, and choose the number of people in your group to plan your adventure.
- Enjoy features like weather information, secure authentication, a customizable AI chatbot, a messenger chat box, places by category and top visited destinations.
- Safely book packages and offers with SSL Commerce and Stripe payment integration, while admins have full control through a dedicated dashboard.

Tools : React, Node.js, Express.js, MongoDB, Firebase, Tailwind, Ant Design, DaisyUI, Stripe.

Personal project :

Sport Spark

[codelink](#) [serverlink](#) [Livelinek](#)

- Summer camp website with a focus on sports is to create an environment that inspires active youth engagement, promotes physical health, teaches valuable life skills.
- Implemented user authentication and authorization features, ensuring secure access to personal sport class collections.

Tools : React, Firebase, Tailwind CSS, Daisy UI, Express JS, Material UI

Cook's Corner

[Github](#) [Livelinek](#)

- Developed a web-based recipe view using React, allowing users to see all the chef's details, and their recipes, and mark a recipe as their favourite recipe.
- Implemented user authentication and authorization features, ensuring secure access to personal recipe collections.

Tools : React, Firebase, Tailwind, Daisy UI, Express JS

EDUCATION :

Diploma in Textile Engineering.
Gov. Textile Institute Chattogram

LANGUAGE:

Bangla (Native), English(Beginner)
